

Durham School of Technology Showcase of Schools

Message from the Principal...

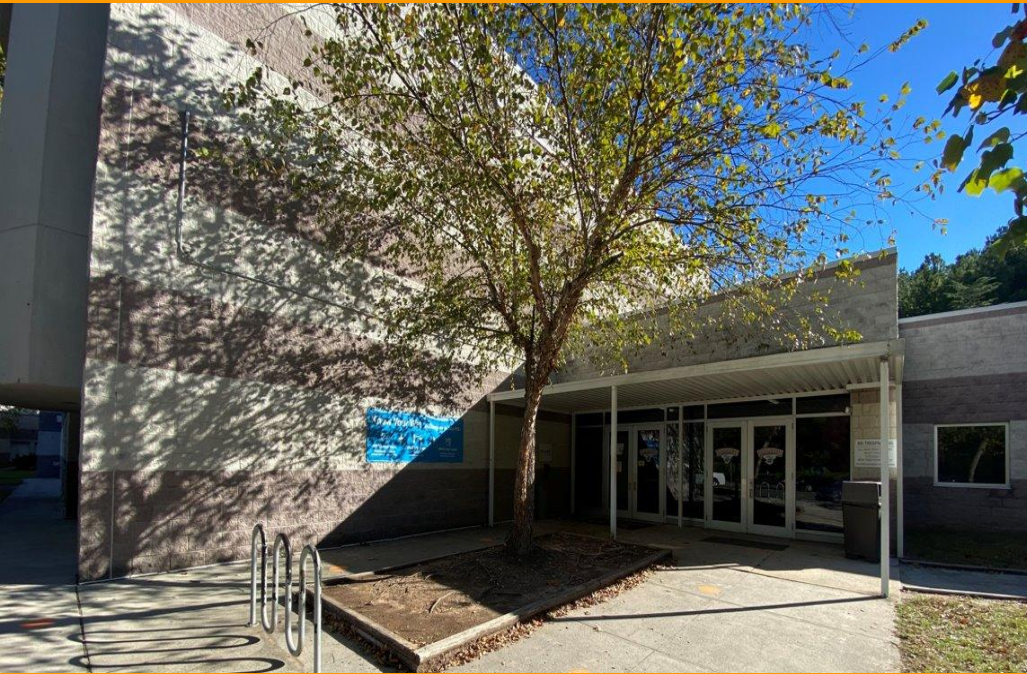

Greetings future DST Scholar!

Thank you for joining us today. Imagine a school designed to provide an education for today! An education that engages learners in real-world solutions to real-world problems; an education that prepares you for the college, career, or the armed forces of your choice!

Imagine Durham School of Technology!

Mr. Lamont Dixon

School History

Durham School of Technology is a rigorous and innovative interdisciplinary (STEM) high school in which students engage in collaborative real-world investigations (Project Based/ Problem Based Learning) designed to build strong working relationships with teachers, fellow students, and community partners.

Established 2007, DST is designed to offer an alternative to the traditional high school experience and provide students with a uniquely different learning environment enriched with a one-to-one computer-to-student ratio. We make sure that students have access to the technologies they will encounter in higher education and the workplace, and teach them 21st-century skills!

CTE

2 Pathways
