

Magnet Coordinator's Message

Hello Spartan Family,

Welcome to the 2021-2022 school year! I'm honored to join the staff of Southern School of Energy and Sustainability as the Magnet Coordinator.

SSES has four amazing magnet pathway academies. They are supported by phenomenal administration and faculty empowered and driven to promote creativity in our students. Students will embark upon a S.T.E.M journey with an emphasis on energy and sustainability woven throughout the curriculum. Students will study real world problems and pose solutions to global issues.

I am excited about being an exemplary advocate of our Magnet Program to help ensure a climate that allows for curiosity and provides an excellent education that fosters academic achievement, character development, and critical thinking. Our students will graduate prepared for enrollment, enlistment, or employment in an ever-changing global society!

I look forward to seeing you soon,

Antia Thomas
