

ADDENDUM 1

Durham Public Schools Request for Statement of Proposal (RFP)

RFP # 179-2324-245-CNS_EQUIP_DW_REBID

Date: 5/9/24

ADDENDUM 1 – Questions and Answers

Q1. What are you asking for will not work in every school?

The schools need to be properly measured as each school may be slightly different. There are a few schools that will not take a conveyor dish machine due to size constraints, there are a few schools that will not need tables changed due to complexities of making the change outs. It is my hope that you all want this done correctly. I have completed hundreds of dish rooms including ones in the Durham Public Schools and many of them have been different in some ways. The last ones we did for Durham Public Schools, we surveyed prior to pricing out the job. We have already surveyed the first 16 and you can see from what was submitted how different things are.

A1. Please provide your best estimate for the bid as stated including estimates for site upgrades as needed.

Q2. How many of the 50 schools have dish machines?

A2. 34 schools have dish machines, although not all are functional.

**Q3. It states in the bid: All dispensers installed on School System property shall become the property of DPS. All dispensers shall be left in place when this contract expires or is terminated.
Does this apply to dish machine chemical dispensers?**

A3. Yes. If the vendor has a different approach in their offerings, please specify and that will be noted in bid tabulations.
